

BUSINESS TECHNOLOGY FOR ARCHITECTURAL, ENGINEERING, AND CONSTRUCTION

WHO'S YOUR TECHNOLOGY EXPERT?

We specialize in architecture, engineering, and construction! With locations throughout Southern Nevada and California, we're the partnership your firm needs. We'll provide you with a collection of industry-leading technology solutions and applications, such as Copiers, Printers, Managed IT Services, and Digital Phone Systems. Our products help you leverage business technology to make your organization run more efficiently today and tomorrow.

LET OUR PRODUCTS BUILD YOUR PLANS

At AIS, we can turn your documents into a revenue source by helping you bill your clients for in-house printing and scanning. We'll provide you with useful and practical tools to create per-project invoicing by the use of only one accounting system to manage your current wide-format, copiers, and printer output systems.

PARTNERING WITH AIS: CREDIBILITY & EXPERIENCE

Partnering with us is easy! Our AEC-specific applications can effortlessly integrate with your current business technology, helping eliminate potential downtime. We also help save your firm money by our accurate bill back software on project costs to clients. Our certified technicians and representatives are dedicated to making your individual integration process easy and efficient. With over 18 years of experience in serving AEC firms, we've got you covered.

Make the switch and use our technology to design and build a plan that enhances your already successful, solid business foundation.

ARCHITECTURAL, ENGINEERING AND CONSTRUCTION

IT SERVICES

Our Managed IT Services team allows your firm to outsource the day-to-day management of information technology needs. We can supplement your in-house IT department to help reduce your network overhead costs, support dynamic business growth, and implement new technologies—all while proactively monitoring your infrastructure and AEC line of business applications, specific to your organization.

TELECOM

Our telecom products and services assist your individualized communication demands. Whether you call it telephony, telecommunications, video conferencing, or, simply, the phone; we offer a full range of services to ensure that you can talk to anyone, anywhere, at any time—making it completely transparent to your customers.

AEC SOFTWARE INTEGRATION FOR COPIERS AND PRINTERS

We offer and lease a variety of multifunction copiers, printers, and wide-format devices. At AIS, we integrate AEC applications with your current devices, such as accounting software within your AEC firms ERP, so you can track the printing to all of your devices for billing purposes. We provide comprehensive, managed document services to optimize your office printing and copying needs with a print assessment, which lowers costs and increases profitability. Our software also allows you to capture and assign your print jobs to each designated project. It's integration made easy.
